3) (10 pts) ANL (Recurrence Relations)

Use the iteration technique to find a Big-Oh bound for the recurrence relation below. Note: you may find the following mathematical results helpful: $2^{log_3 n} = n^{log_3 2}$, and $\sum_{i=0}^{\infty}(\frac{2}{3})^i = 3$. You may use these without proof in your work below.

$$T(n) = 2T\left(\frac{n}{3}\right) + O(n), for\ n > 1$$
$$T(1) = O(1)$$

Computer Science Foundation Exam

May 18, 2019

Section II B

ALGORITHMS AND ANALYSIS TOOLS

NO books, notes, or calculators may be used,
and you must work entirely on your own.

Name: _____

UCFID: _____

NID: _____

Question #	Max Pts	Category	Score
1	10	DSN	
2	5	ALG	
3	10	DSN	
TOTAL	25		

You must do all 3 problems in this section of the exam.

Problems will be graded based on the completeness of the solution steps and <u>not</u> graded based on the answer alone. Credit cannot be given unless all work is shown and is readable. Be complete, yet concise, and above all <u>be neat</u>. For each coding question, assume that all of the necessary includes (stdlib, stdio, math, string) for that particular question have been made.
